## INTRODUCTION.

---

THE principal object of the present Catalogue has been to give a complete list of the species of the HYMENOPTEROUS INSECTS that have been recorded as found in Great Britain, with their principal Synonyms.

It is intended for the following purposes:—

As a Complete List of the species at present known as inhabiting the British Islands.

As Labels for the Cabinet, for which purpose it has been printed in a peculiar type and only on one side of the paper.

The Collection contains almost every species in the list, and it consists of the type specimens described by the Rev. WILLIAM KIRBY, Dr. LEACH, Mr. JAMES FRANCIS STEPHENS, Mr. FRANCIS WALKER and Mr. FREDERICK SMITH.

The Catalogue has been prepared by Mr. FREDERICK SMITH, who has paid so much attention to this order of Insects.
